EEG-VAE: Full Paper Title

Anonymous Authors¹

Abstract

Ton résumé ici (150–200 mots).

1. Introduction

- EEG
Contributions : - goal of the paper : propose a variational autoencoder (VAE) for EEG data called EEG-VAE - propose a 2 stage pretraining pipeline to enforce the learninf of more semantic representations. - analyze the relevance of the mamba architecture for EEG data. - evaluate the learned representations with a faire and unbiased comparison with other foundation models with a focus on imagined speech decoding modality.

2. Method

- 2.1. Pipeline Overview
- 2.2. EEG-VAE Architecture
- 2.3. Losses
- 2.4. Pretraining Results and Analysis

3. Downstream Evaluation and Comparisons

4. Conclusion
